**INDUSTRY OVERVIEW -**

**Indian Power Market –**

With a generation capacity of 442.85 GW, India is the third-largest producer and consumer of electricity in the world. India's power generation witnessed its highest growth rate in over 30 years in FY23. Power generation in India increased by 8.87% to 1,624.15 billion kilowatt-hours (kWh) in FY23. In FY24 (until January 2024), the power generation in India was 1,452.42 BU. During FY10-FY23, electricity generation in India increased at a CAGR of 4.75%. In the Union Budget 2022-23, the government allocated Rs. 7,327 crore (US\$ 885 million) for the solar power sector including grid, off-grid, and PM-KUSUM projects.

**Total generation in India (including renewable sources) (BU)**

(Source:RHP)

For FY24, the electricity generation target from conventional sources has been fixed at 1,750 BU, comprising 1,324.11 BU of thermal energy, 156.70 BU of hydro energy, 46.19 BU of nuclear energy, 215 BU of RES (excluding hydro), and 8 BU to be imported from Bhutan.

**Indian Renewable Energy Industry –**

Installed renewable power generation capacity has increased at a fast pace over the past few years, posting a CAGR of 15.4% between FY16 and FY23. India has 125.15 GW of renewable energy capacity in FY23. As of March 2024, India's renewable energy capacity, including biomass, waste-to-energy, and hydropower, reached 143.64 GW, with non-fossil sources contributing 42.25% of total installed power. The country aims to increase renewable capacity to 170 GW by March 2025 and achieve 450 GW by 2030, with over 60% from solar. Solar capacity has grown 26 times in the past nine years, reaching 73.32 GW in December 2023, with 7.5 GW added in 2023 alone. India's total power generation capacity stood at 416 GW in FY23, with renewable sources accounting for 125 GW (30%). The country generated 75.57 BU of solar power in the first eleven months of FY24. Hydropower expansion is underway, with 15 GW under construction to boost total capacity to 67 GW by 2031-32. Northern India is expected to become a renewable energy hub with a potential capacity of 363 GW.

## Recommendation -

Chamunda Electricals Limited has been in the industry since 2013 and has good experience in the industry.

The P/E on a post-IPO annualized basis is around 14.69 times which makes it fairly priced.

The company's overall management structure is condensed and not satisfactory. A significant reliance on a single individual, who holds multiple key management positions, raises concerns regarding leadership diversification.

The company's top line has increased consistently over the year. But the bottom line and profitability margins have a sudden increase in FY23 and FY24 which raises concern over its sustainability. The company had also incurred loss and had negative cash flow from operations in FY22.

Also, the company is highly concentrated and operates majorly in Gujarat and it heavily relies on top 10 customers as 100% of the revenue is generated from them.

Although, the company has a good order book, the financials of the company slightly looks unsustainable with sudden increases in net profit and profitability/return margins.

The company has potential to grow and perform exponentially if it focuses on its solar power plant generation vertical as the industry is expected to grow at a CAGR of 15.4% with government support.

Thus, investors can **AVOID** this IPO for now.
